

**A paradox :
the role of
religion at the
age of
globalization**

1- Globalization

**2- Deterritorialization
of religions**

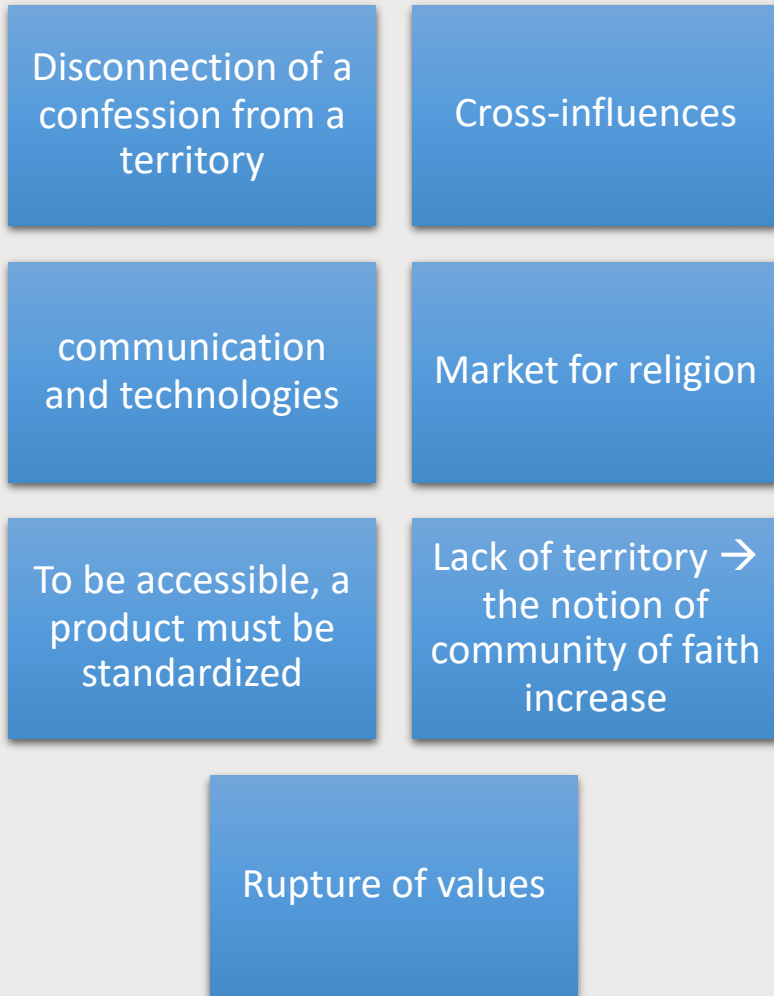

**3- Resistance to this
globalization**

3 main effects :

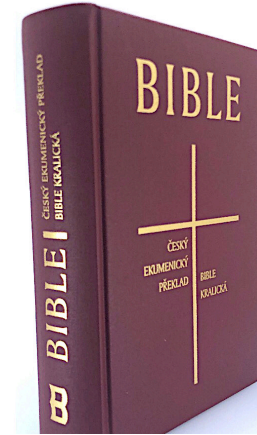

- **Environmental**
- **Social**
- **Cultural**

2- A deterritorialization of religions

3- A resistance to globalization.

- Reaction to globalization → Fundamentalisms = process of returning to the foundations of a religion
- The refusal of a profane culture
- Secular society → produce values perceived as contrary to religions
- Pure religion = the religious norm is separated from social morality
- Western secular culture no longer has religious knowledge

To conclude

- paradoxical position
- Following of globalization → detaching themselves from the culture, market of the religious
- Rejection of the values of globalization

Therefore, religion uses the **means that allow globalization** in order to **restrain globalization itself**.
